22. Flight Procedures

<div>1. IFR Arrival</div> <div>1.1 Aircraft will normally be cleared by ACC Copenhagen to L VO, TACAN SKR, RNAV point DINUT or TISET.</div> <div>1.2 Radio communication failure</div> <div>Navigation aid designated for radio communication failure during IMC for arriving aircraft is L VO.</div> <div>1.3 Use of ILS for approach in VMC</div> <div>When ILS is intended used for approach in VMC, ATC must be advised at least 5 minutes before beginning the approach, as the critical areas in front of the ILS facilities normally may be expected only to be kept free of disturbing objects in IMC.</div> <div>2. IFR Departure</div> <div>2.1 Standard Instrument Departures</div> <div>Standard Instrument Departures (SID) have not been established.</div> <div>2.2 Omnidirectional departures</div> <div>RWY 10L/R and 28R/L: Climb straight ahead to at least 800 FT MSL before turn is commenced.</div> <div>3. Low Visibility Procedures</div> <div>3.1 Criteria for activation of Low Visibility Procedures (LVP) are prompted by ATC and will normally be introduced when the RVR is less than 800 M. However ATC can decide to minimize number of aircraft and vehicles on the maneuvering area when visibility is greater than 800 m and up to approx. 3 km. (until ATC is able to see the whole area).</div> <div>3.2 Pilots will be informed when Low Visibility Procedures are in operation by ATIS and/or RTF. Pilots will be informed over RTF when Low Visibility Procedures are cancelled.</div>	<div>3.3 The following procedures will apply during Low Visibility Procedures:</div> <div>ATC Procedures:</div> <div>When RVR is below 550 M (alternative MET VIS below 600 M), ATC can only allow one aircraft/one formation of aircraft on the maneuvering area at a time.</div> <div>When RVR/MET VIS is below 800 M, but greater than mentioned above, ATC can only allow one aircraft/one formation of Fighter aircraft on each part of the maneuvering area at a time. The parts are described in Local Procedures. Just follow ATC instructions.</div> <div>4. Reduced Runway Separation Minima</div> <div>4.1 ATC may apply reduced runway separation for all runways at Skrydstrup. For succeeding military aircraft, this will be used only for VFR-flights.</div> <div>4.2 Traffic information will be given to succeeding aircraft.</div> <div>4.3 For military and civilian flights the phraseology will be: "[Traffic information] CLEARED TO LAND" / "[Traffic information] CLEARED FOR TAKEOFF"</div> <div>4.4 ATC will make sure that approved minimum separation will exist between aircraft.</div> <div>4.5 Reduced runway separation will not be used between departing and preceding landed aircraft.</div> <div>5. Special VFR routes for light aircraft and helicopters</div> <div>5.1 ATC clearance for special VFR (SVFR) traffic will normally be issued via the following reporting points:</div> <div>Christiansfeld (power line crossing motorway), PSN 55 20 49N 009 26 42E.</div> <div>Jels (Southern edge of Skodborg forest), PSN 55 22 21N 009 11 21E.</div> <div>Vojens (intersection North of Vojens town), PSN 55 16 05N 009 17 20E.</div> <div>5.2 Arriving VFR traffic may be instructed to hold at one of the reporting points.</div> <div>5.3 Altitude as instructed by ATC.</div>
